

**Narendra Sen** is a visionary entrepreneur and technologist, renowned for his leadership in shaping India's digital infrastructure landscape.

As the Founder and CEO of **RackBank®**, he has built one of India's most trusted datacentre companies, delivering world-class cloud computing, datacentre infrastructure and AI services to clients across the globe. Under his leadership for over a decade, RackBank® has emerged as a frontrunner in sustainable, scalable, and future-ready datacentre solutions.

Furthering his commitment to innovation and environmental responsibility, Narendra has founded **NeevCloud**, a pioneering AI cloud platform focused on building **India's first AI**

**SuperCloud** which prioritizes sovereign cloud infrastructure as the foundation for building a trusted, compliant AI supercloud powered by supercompute. Additionally, his vision is to build a sustainable digital ecosystem by combining high-performance computing with energy-efficient AI infrastructure.

With deep expertise in **cloud technologies, datacentre strategy, and infrastructure management**, Narendra is a sought-after advisor, speaker, and consultant in the tech industry. His insights are valued by enterprises looking to scale efficiently and responsibly in the age of AI.
